

Joseph Valdez Gaces

Blk. 40 Lot 32 Phase 6 | Mamatid, Cabuyao, Laguna, 4025 | josephvaldezgaces@gmail.com | 0927-045-3619

Professional Summary

Fresh BSIT graduate with hands-on experience in computer hardware assembly, configuration, and troubleshooting. Knowledgeable in hardware and software troubleshooting, Windows configuration, networking fundamentals, IT equipment maintenance, and web development. Experienced in developing web applications using Python, Django, JavaScript, HTML, CSS, and SQL. Seeking an entry-level IT position to apply my technical skills, contribute to reliable IT support, and continue developing practical industry experience.

Experience

Nestle / B-Mirk Production Support

Cabuyao, Laguna
August 2026 – Current

- Support daily production operations to ensure tasks are completed according to established procedures and schedules.
- Monitor and assist with ongoing production activities and report issues or irregularities to the appropriate personnel.
- Maintain accurate production records, reports, and documentation.

Gender and Development Office Technical Support Intern

Calamba, Laguna
January 2025 – April 2025

- Coordinated and designed a technical assistance request system using SDLC methodology.
- Assisted in the development of technical assistance request system using Django framework.
- Assisted with testing and debugging the system.
- Used AI-powered transcription software to convert audio recordings to text documents; proofread and manually edited the transcripts for accuracy.
- Performed basic printer troubleshooting, such as resolving paper jams and print issues.
- Assisted with connecting laptop to TV via HDMI for weekly digital flag ceremonies and announcements.
- Managed and delivered documents between departments and offices.
- Designed graphic materials for the organization's social media page.
- Edited trailer videos for organization's radio broadcasting.

Projects

Academic Project

Online Point of Sales and Inventory Management System for The 1957 Coffee Bar with Data Visualization

- Designed system workflows and business processes.
- Created interactive system prototypes and user interface designs using Figma.
- Developed the web-based system using HTML, CSS, JavaScript and Django framework.
- Conducted testing, debugging, and system revisions.
- Prepared and hosted the system to Render (hosting service) via GitHub repository.
- Prepared and maintained project documentation and thesis manuscript.
